PROJECT

Medical Booking Appointment System

Technologies: ReactJs, NodeJs, RESTful API, MySQL, Bootstrap

Medical Booking Appointment System – Created a platform to streamline doctor-patient appointment scheduling, with features like user account management, doctor search, booking, and reminders. Contributed to both frontend and backend, improving user experience and functionality.

- Github: <https://github.com/nxsag100301/BookingCare>

Quiz

Technologies: ReactJs(Hook), NodeJS, RESTful API, Bootstrap

Quiz Project – Developed an interactive quiz application allowing users to answer questions, track scores, and view results in real time. Integrated features for question management, answer validation, and result analysis. Focused on enhancing user engagement and data accuracy.
